BLOODSTOCK CROSS ANALYSIS

EQUI-X

Read the cross. Back the edge.

Arqana Deauville October Yearling Sale Part 1 2026 — 194 lots (1–197) · 38 colour-coded (33 full · 5 partial) · 29 in italic

How to read every number

The six headline numbers (one line per lot)

Data point	What it tells you
Sire Ave	This sire's own baseline average rating across his runners generally – the constant starting point for his side of the pedigree.
Damsire Ave	The dam's sire's own baseline average rating, on the same basis – the constant starting point for the bottom line.
Mare Perf %	How much better the mare's foals run versus the expected cross average. Around 100 is par.
Sire + Mare %	The sire's strength and the mare's strength combined into a single read on both halves of the pedigree.
Sire × Damsire Cross	The average result of this exact sire-over-damsire nick, counted only where enough runners exist. The most telling figure — where it is proven the cross is a known quantity, and where it is high it can outperform the sire and mare lines. Where it is absent or only an early reading, the score reads as potential. Unlike the other five figures, the Cross sits on its own raw-ratings scale rather than the ~100-is-par percentage scale.
Cross % (in comments)	The proven sire × damsire cross average that feeds the Overall Score where enough runners exist. Comments quote it, worded on Bruce's own cross scale.
Overall Score	Bruce's combined read across Mare Perf, Sire+Mare and the Cross (or of whichever of those is available), colour-banded on his own worksheet.

The colour scale

Band	Reading
Red	Very strong
Blue	Strong
Yellow	Very good
Green	Good
Grey	Above average
– (no colour)	Not yet colour-banded – either under par or not enough rated runners to read.

Colour bands are taken strictly from the colour on the Overall Score cell of Bruce's own worksheet – nothing is recalculated or re-banded here. The comment wording follows his scales for each figure.

Full colour vs partial vs italic

Rated produce	How it is shown
3 or more	Full coloured header strap, straight (non-italic) type, and a comment.
Exactly 2	Only the Score box is colour-coded (where Bruce coloured it); the **whole card** – figures, previous-foal table and comment – is set in *italic*. Lots with exactly two rated produce are italic whether or not they carry a colour.
Fewer than 2	No colour and no comment – not enough rated runners to read. The few lots Bruce has coloured on fewer than two rated produce show the coloured Score box in italic, with a comment that flags the thin evidence.

Sale history

Where shown	What it means
Box number	Shown next to the sex, to the right of the header.
“Foal: …” in the header	This catalogue lot’s own prior sale as a foal, before becoming this yearling – shown after the box number. Only appears where such a sale is on record.
Price	That previous foal’s own recorded sale price. May be blank if no sale was found.

VERDICT ***Very strong***

A very strong read overall at 169.2%, taken from the sire+mare cross-check of 169.2% (mare performance 100.0%). No proven sire × damsire cross yet, so the score reads as potential. Based on just two rated produce so far - one to watch as the page fills in.

Vraie Storm (IRE) 2020 M	67	1m2f	Le Havre (IRE) 10.5f	80	62.9	72.1	67.7	EUR 34,000

VERDICT **Above average**

An above average read overall at 100.2%, built on mare performance of 70.0%, sire+mare of 144.6% and a sire × damsire cross of 86.0% (very good on the cross scale). The 86.0% cross is very good - stronger than the above average overall band, so it arguably should have lifted this one higher.

VERDICT ***Very strong***

A very strong read overall at 221.6%, taken from the sire+mare cross-check of 221.6% (mare performance 160.0%). No proven sire × damsire cross yet, so the score reads as potential. Based on just two rated produce so far - one to watch as the page fills in.
